

Up Front

by JOHN CROUCH, chief executive officer, American Angus Association

Serving customers with EPD education

As I write this column for the March issue of the *Angus Beef Bulletin*, it is mid-January. Hopefully, by the time this magazine reaches the hands of readers, the weather will be kinder, moisture conditions will be favorable and little green shoots will be poking through the surface of the soil.

Understanding birth weight

It will almost be time to turn bulls with cows for those herds that practice spring calving. Accordingly, about 60% of the national cow herd calves in the spring, while 40% calves in the fall. As producers look at management practices that enhance efficiency, this percentage may change in favor of fall calving.

In consideration of the season wherein many bull sales are scheduled, it always seems appropriate to talk about factors that are involved in the selection process. Further to this point, a couple of days ago a longtime friend

and Angus breeder from Iowa called to inform me of a problem he was having.

"John," he said, "how do I respond to my bull buyers who tell me that the bull with a low-birth-weight (BW) expected progeny difference (EPD) that they purchased from me is siring heavy calves?" Then, the perennial question was posed, "If I use a bull with a +4.0-pound (lb.) birth EPD, what will his calves weigh?"

For those of us who have been working with EPDs for many years, the answers to these questions seem obvious. It is important to remember that many new people enter the cattle business each year. It is a flawed assumption to think that each one has a basic understanding of the decision-support tools that breeders apply to the process of selecting seedstock.

Predictions of differences

Simply put, EPDs are numbers that assist producers in the process

of seedstock selection. They quantify those factors that cannot be assessed visually.

Birth weight, for example, is one of many traits that cannot be subjectively assessed with any degree of accuracy. Birth weight is an important trait to accurately measure, simply because it has more to do with ease of calving than perhaps any other factor. The formulation for calculating BW EPD not only considers the individual birth weight of the animal in question but also the birth weights of thousands of relatives in the individual's pedigree to arrive at a prediction of the transmitting ability of that animal as a parent.

Because there are additional environmental factors that also affect birth weight, and other weights as well, BW EPD cannot be used to predict an actual weight. It can, however, be effectively used to predict the average differences in birth weight of the progeny of two sires, provided the

sires are mated to cows of comparable genetic merit for birth weight and managed under the same conditions.

The objective of characterizing birth weight is the elimination of calving trouble. Tremendous strides in technology have been made in recent years with the development of calving ease direct (CED) and calving ease maternal (CEM) EPDs, which incorporate birth weights, calving ease scores and the correlated relationships of other traits.

As the sales season moves into full swing, a big part of consumer relations and customer service involves assisting buyers with the necessary information they need to make the most intelligent decisions possible in the selection of seedstock. The American Angus Association has an abundance of information and literature explaining Angus EPDs and dollar value indexes (\$Values) that you can request. What's more, it's free of charge! Call the office at 816-383-5100, or call your regional manager to request these materials.

Finally, there are still a few EPD skeptics who offer isolated and varying accounts as to why EPDs do not work. Far be it from me to try to convince them otherwise. I, for one, could not imagine participating in the bull-buying process without them. Progressively minded commercial producers agree.

AMERICAN ANGUS ASSOCIATION®

OFFICERS

Paul Hill, president & chairman of the board, 11503 SR 554, Bidwell, OH 45614; champion@jbnets.net
John Crouch, chief executive officer, 3201 Frederick Ave., Saint Joseph, MO 64506; jcrouch@angus.org
Jay King, vice president & vice chairman of the board, 28287 Woodside Dr., Rock Falls, IL 61071; svrealty@cin.net
Bill Davis, treasurer, 34840 CR 106, Sidney, MT 59270, rolnrok@hughes.net

BOARD OF DIRECTORS

For Board member contact information, visit www.angus.org/board.htm

Terms expiring in 2008 —

Gregg Blythe, Alabama
Bill Davis, Montana
Robert (Bob) Schlutz, Iowa
John Schurr, Nebraska
Gordon Stucky, Kansas

Terms expiring in 2009 —

Al DeClerk, Arkansas
Joe Hampton, North Carolina
Steve Olson, Texas
Rob Thomas, Oregon
Cathy Watkins, Indiana

Terms expiring in 2010 —

Jarold Callahan, Oklahoma
Norman Garton, Missouri
Chad Hoffman, Illinois
James Rentz, Ohio
Phil Trowbridge, New York

ADMINISTRATIVE STAFF

Chief executive officer: John Crouch
Executive administrative assistant: Diane Strahm
Vice presidents: Finance — Richard Wilson
Information & Data Programs — Bill Bowman
Industry Relations — Jim Shirley

DEPARTMENTAL STAFF BY DIVISION

Finance — Kenny Miller, assistant director of finance; Richard Wilson, director of finance
Industry Relations — James Fisher, director of junior activities; Sara Moyer, director of AngusSource®; Jim Shirley, director of activities; Shelia Stannard, director of communications & events

Information & Data Programs — Lou Ann Adams, director of information systems; Bill Bowman, director of performance programs; Ty Groshans, director of commercial programs and assistant director of performance programs; Scott Johnson, director of Angus Information Management Software; Sally Northcutt, director of genetic research; Bryce Schumann, director of member services & office management; Carol Waller, assistant director of member services & office management

ANGUS FOUNDATION

President: Milford Jenkins, Saint Joseph, Mo.; mjenkins@angusfoundation.org

ANGUS GENETICS INC.

President: Bill Bowman, Saint Joseph, Mo.; bbowman@angus.org

ANGUS PRODUCTIONS INC.

President: Terry Cotton, Saint Joseph, Mo. For a complete staff listing, see page 2.

CERTIFIED ANGUS BEEF LLC

President: John Stika, Wooster, Ohio. For a complete staff listing, see page 64.

AMERICAN ANGUS AUXILIARY

President: Nancy Thelen, Saline, Mich.

NATIONAL JUNIOR ANGUS ASSOCIATION

President: Justin Brosey, Ohio; justinbroz@aol.com. For a complete listing of NJAA Board Members, visit www.njaa.info.
